

About

HYPERTEC SOLUTION, established in 2000, specializes in mechanical design and mechatronics, serving sectors such as aerospace, Machine tools and automation, Automotive/Motorsport, Virtual Commissioning, Oil & Gas/Soil Drilling. The company excels in designing complex systems for space missions, satellite components, and structural parts. It is accredited as an Industrial Laboratory for R&D by Emilia-Romagna High Technology Network since 2021. With expertise in structural calculations and simulations, HYPERTEC SOLUTION ensures projects meet international standards, aiming for excellence in aerospace design to push the boundaries of human capability.
