

## About

POGGIPOLINI, founded in 1950 in Bologna, specializes design, engineering, and high precision manufacturing of critical and standard fasteners and precision components for aero-engine, transmission, landing gear, and aerospace applications. The company is known for innovative solutions, including weight reduction, complex assembly, and additive manufacturing. POGGIPOLINI focuses on critical components and structural fastening systems for the aviation, defense, and space sectors.

## Products & Services

- **Specialty Fasteners:** critical and vital bolts, studs, nuts, and screws in titanium, Inconel, and special steel alloys, produced from machining and/or hot forging and hot thread rolling;
- **Standard Fasteners:** aerospace standard bolts, studs, nuts, and screws produced in titanium and Inconel.
- **Engineered Products:** Locknuts, lock washers, rods, fluid fittings, and connectors
- **Critical Products:** transmission axles with splines and assembly
- **Precision Products:** aerospace components, housings, and cases
- **Engineering, manufacturing and assembly** of custom projects, using also advanced technologies as additive manufacturing if required.
