

About

Founded in 2011, BLACKS specializes in the design, prototyping, and manufacturing of advanced composite materials components. Combining engineering expertise with craftsmanship, the company delivers high-quality solutions for demanding industries. With a team of 60 skilled professionals, BLACKS leverages cutting-edge technology, additive manufacturing, and precision quality control to ensure top-tier results.

Products & Services

- Advanced Composite Parts Production - Precision manufacturing using autoclave curing and vacuum-sealed processes.
- Engineering & Modeling - 3D CAD design, mold development, and multi-process simulations.
- 3D-Lab - Additive manufacturing for rapid prototyping, mold production, and complex composite parts.
- Quality Control - Rigorous metrology processes for final product validation.

Main Markets

- Italy
- Europe

References

Blacks supplies top European motorsport brands and has established solid cooperations with aerospace innovative companies.

Certifications

- ISO 9001:2015 Quality management system
- ISO 14001:2015 Environmental management system
- ISO 9100:2018 IN PROGRESS (WITHIN FIRST QUARTER 2026)
- ISO 45001:2023 IN PROGRESS (WITHIN 2025)
