

About

Founded in 1955, CURTI began as a small manufacturer of textile and agricultural machinery parts. Today, it is a leader in aeronautical systems and services, employing over 600 people across 10 global locations. Known for reliability and high-quality standards, CURTI excels in co-engineering complex systems, particularly in the Naval and Defense sectors.

The company's advanced design software capabilities and mastery in process optimization have fueled its growth. With over 60,000 sqm of production facilities, with 30,000 sqm dedicated to covered space, CURTI operates as "TIER1", with maximum capacities in the context of the most extreme verticalization of the systems and structures required by customers.
