

About

Founded in Bologna in 1911, Paioli relocated to Sant'Agata Bolognese in the late 1960s. The company specializes in four key product lines: front forks, shock absorbers, fuel components, and HVAC valves.

Paioli handles a wide range of materials and processes, including machining on aluminum, steel and brass, sintered parts, gravity die casted parts, zamak, forged steel and forged aluminium parts, gaskets and seals, rubbers, plastics and ultrasonic welding processes, chrome plating, zinc plating, anodizing, painting, till assembly and testing of the finished products.

The company operates within the industrial cluster of Emilia-Romagna, offering technical solutions for complex systems and in-house manufacturing of various components.
